

FLOATING GRAPHICS

**MOVEMENT,
THAT ELEVATES
YOUR EMBLEMS.**

UNBELIEVABLE THREE-DIMENSIONAL, SCROLLING AND CHANGING EFFECTS FOR EMBLEMS.

Floating Graphics is a licensed technology that enables you to produce two-dimensional and three-dimensional emblems and to add eye catching 3D depth, scrolling and image changing effects.

With hundreds of different finishes, a limitless range of colors, embossing and debossing effects, you are able to give Floating Graphic emblems a look not possible with any other technology

“The material used in the production of Floating Graphics can range from relatively inexpensive to performance grade allowing emblems to be used for both indoor and outdoor applications.

COLOR-DEC®

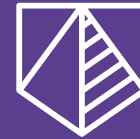

Thanks to its unique process, Floating Graphics emblems are an ideal way to produce safe, secure, trademarks. It is actually possible to produce the background of another emblem using Floating Graphics technology.

THREE TYPES OF FLOATING GRAPHICS

SCROLLING

Your design scrolls up and down, or side to side, when you change your point of view.

CHANGING

Your design changes when you change your point of view.

FLOATING

Your design appears to be floating inside the emblem.
