The Art of **FABRIC**

Dear Readers,

Welcome to our first issue of
- The Art of Fabric - Online - Magazine.

Winter is coming and Christmast is not so far away. At that time textiles are playing an important role. When it is getting dark and cold outside you find a place on the sofa with a cup of tea and a cozy blanket. Or when the Christmas table is decorated with an elegant table cloth, the fine curtains closed and under the Christmas tree lies a magnificent scarf or a soft bath towel, than it has something to do with you and perhaps with EAT too. With the help of EAT your creative ideas will become marvelous textiles which are surrounding your clients. Your satisfaction is our aim to always develop new functions for you.

To give you the possibility to be up to date about the latest developments all the time, we will notify you regularly with our online magazine - The Art of Fabric -. Let us surprise you!

Your EAT - Team

The DesignScope Company

3D Photo Simulation

With the 3D Photo Simulation, results from the modules: - 3D Fabric Simulation
- 3D Textile Simulation
- 3D Knit Simulation
are calculated in high-resolution into defined areas of a preloaded photo file.

The system calculates light and shadow of the photo and merges it 3-dimensionally with the structure and sheen effects of the fabric pasted. The result creates a never before seen reality in the eyes of the viewer.

If you want to see more please go to the Catalogues on our Webpage.

The DesignScope Company

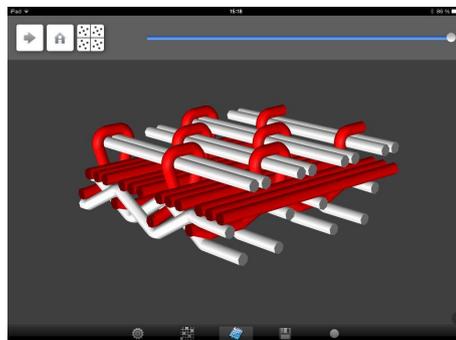

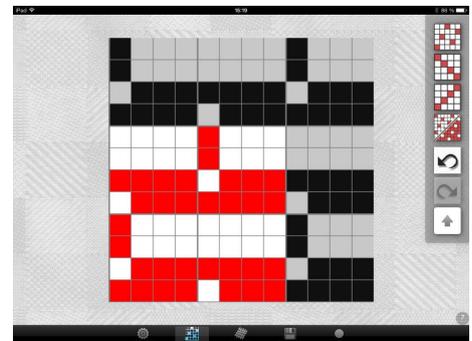

DesignBase Showtime

With this application, files from 3D Fabric Simulation, 3D Textile Simulation and 3D Knit Simulation in different colorways from DesignBase victor can be combined with the 3D Photo Simulation. That allows for high flexibility in creating product and design presentations.

DesignBase Showtime available on the itunes Store®!

My Weave

The revolutionary 3-dimensional weave creation of EAT, 3D-Weave now also available as app for your iPad.®

My Weave available on the itunes Store®!

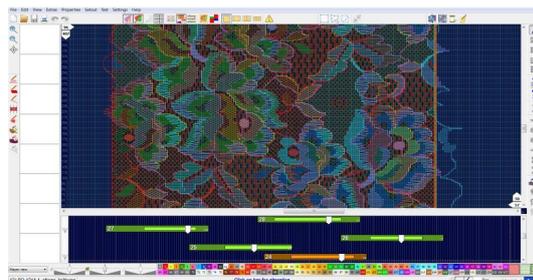

The DesignScope Company

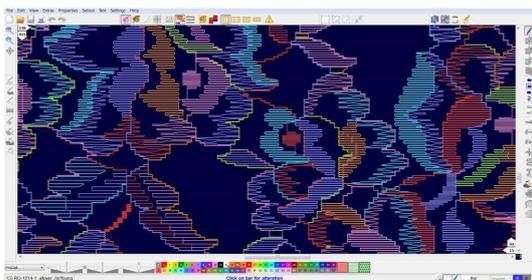

ProCad Developer

The next Generation - now on Windows®

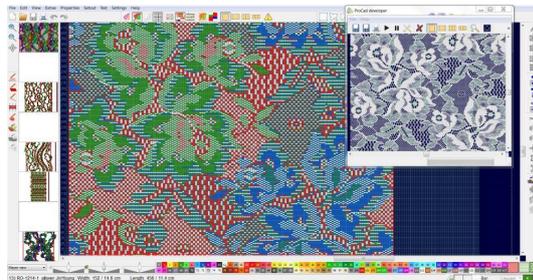

- From initial sketch to final pattern
- From design to production
- From true fabric simulation to the machine ready file

Editing of Multibar and Jacquards

Jacquard incl. Simulation

Drafting of Lappings

The most widely used drafting software in the world for the lace industry.
For the best lace designers only the best drafting software.

Professional Software
authorized by

KARL MAYER

DesignScope victor New Version 12 available

now also Windows 8[®] compatible!

Interest?

Then please give us a call at:

0049 - (0) 2152 - 2007 0

or send us an Email:

eat@eatmail.info

We like to advise you.

Here are some news and changes in Version 12:

- additional clipboard windows up to 25 available.
- new update tool for a better and easier download of the actual software version.
- new at the Scope Editor:
 - Cursor Repeat Mode, for repeating the cursor design directly in an easier way.
 - Saving mask parameter. Recurring operations can be saved and reloaded quickly.
 - Automatic color reduction in Scope.
- JC4 can be written now as a Disk Image. This means a faster creation of JC4 floppy disks.
- Additional features in the Presenter function with whom you can place and rescale areas easily.

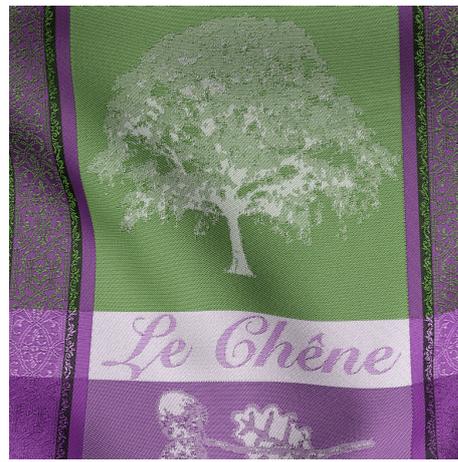

Magazine Specials:

You already have the 3D Fabric simulation on your system and using it?
Then we have something for you!

Download the simulation including the relevant runningchain from this magazine simply on your computer.
