

FITTED SHEETS

FITTED SHEETS BOX MAKING INSTALLATION FOR HOME TEXTILE

This automatic machine is used for manufacturing fitted sheets box with 90 degrees corners drop. The process consists of: fabric unwinding from rolls, edges cutting, cross cutting, corners formation, label dispensing, corners sewing. Different product types can be processed with an outstanding quality. The fitted sheets line is equipped with a modern touch screen that allows you to easily operate the machine and monitor all settings.

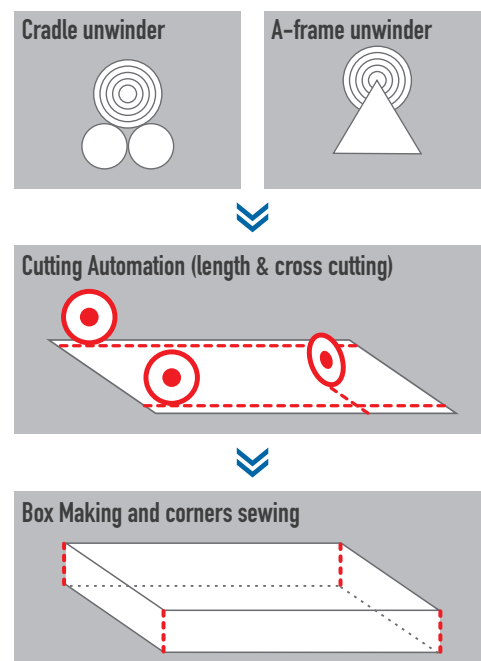

UNCOMPROMISING PERFORMANCE AND QUALITY

Unprecedented productivity, quality and precision in cutting system and corners sewing. This is the result of a perfect symbiosis between intelligent control technology and precision engineering. The low operating cost and simple integration in existing production workflows further contribute to an extraordinarily quick ROI.

PRECISION BY DESIGN

The perfect accuracy in the corners formation allows speeding up the productivity process and have complete flexibility in the corners drop sizes. Thanks to their modular design, the length and cross cutting systems are suitable for uncountable product size.
